PROFESSIONAL SUMMARY

Product-minded User Experience Designer with 5 years of experience building B2B, B2C and D2C digital products for global clients (US, Saudi Arabia, Japan). Currently pursuing an MSc in Product Management & UX Design (PMUX) at SKEMA,Paris and Politecnico di Milano, Milan. Seeking a 6-month Product Management internship starting May 2027.

EDUCATION

MSc 1-Year Product Management & UX Design — *2026 – 2027*

SKEMA Business School, Paris • Politecnico di Milano, Milan • Polimi.designs

Bachelor of Architecture (B.Arch) — *2017 – 2022*

RTMNU Nagpur, India • CGPA: 7.81/10

- Undergraduate Thesis: "A Biophilia Wellness Retreat, Abu Dhabi" — a nature-integrated wellness and hospitality design exploring biophilic design principles.

WORK EXPERIENCE

Royal Cyber — *Sep 2024 – Aug 2026*

Senior UX Designer • Full-time • Remote

Client: M&M's, New York

- Led end-to-end UX and UI design for the M&M's "Design Your Own" mobile web experience for the flagship New York store, enabling customers to personalize chocolates with custom colors, photos, text, and clip art, and place pick-up orders directly from their phones.
- Ran requirement-gathering sessions with M&M's business and engineering stakeholders, then architected the complete customization and checkout flow color selection, image upload and editing, text input, clip art, packaging, order review, and payment for an intuitive, conversion-optimized journey.
- Designed error, edge-case, and empty-state screens (store maintenance, store closed, upload failure) for a consistent, trust-building experience.
- Conducted user flow mapping across multiple complex states and conditional logic paths, prioritizing which decision points to simplify first to reduce drop-offs throughout the customization experience.

Client: Cruise Saudi, Riyadh

- Designed the end-to-end mobile experience for Aroya Cruise, a first-of-its-kind platform for Cruise Saudi, structuring pre-booking, post-booking, and onboard journeys as customer journey maps across 250+ screens.
- Led discovery and stakeholder workshops with Cruise Saudi's business and engineering teams to gather requirements and sequence the pre-booking, post-booking, and onboard journeys into a phased MVP roadmap.
- Built a bilingual (English/Arabic) RTL mobile design system ensuring cultural accuracy, typographic hierarchy, and interaction consistency across both language versions.
- Leveraged AI tools (Figma Make, Lovable AI, generative AI prompting) to accelerate early-stage ideation and wireframe iteration, significantly reducing concept exploration time.
- Mapped complex multi-state user flows and prioritized which to simplify first, contributing to a successful MVP launch with positive early usability feedback.
- Partnered cross-functionally with business, client, and engineering teams to validate requirements, define success metrics for the MVP, and support implementation.

Client: Mattress Firm, USA

- Increased checkout conversions by 17% leading UX design for online payment flows integrating Synchrony, Affirm, and Progressive Leasing.
- Built and maintained the DreamHub Design System from the ground up, reducing design-dev misalignment and accelerating delivery velocity by 40%.
- Applied machine learning behavioral insights with analytics teams to drive data-informed design decisions and iterate on UX strategy.
- Led continuous user research and usability testing, synthesizing qualitative and quantitative insights into design and product recommendations, and partnering cross-functionally for iterative refinements.

- Enhanced Clienteling tools for in-store Sleep Experts, boosting engagement through personalized, tailored interactions.

Arzooo *Apr 2023 – Aug 2024*

Senior UX Designer • Full-time • Bangalore, India

- Increased operational efficiency by 28% designing Falcon, a mobile-first B2B platform for order management, inventory tracking, and real-time performance dashboards.
- Owned product strategy for the Falcon onboarding flow, applying the AARRR framework to redesign drop-off points and align design decisions with acquisition and retention metrics; improving seller activation by 32%.
- Reduced seller support queries by 24% by prioritizing and unifying order management, payments, inventory, and CRM workflows into one intuitive system, GoSeller.
- Integrated AI-powered content suggestions and smart defaults into seller flows, reducing manual input and improving task completion rates.
- Mentored junior designers on UX best practices, improving team design velocity and output quality across multiple product squads.

Arzooo *Aug 2022 – Apr 2023*

UX Designer • Full-time • Bangalore, India

- Increased checkout conversion rates by 22% on GoStor (Android, iOS, Desktop) through end-to-end product design, A/B testing, and cross-platform UX enhancements.
- Accelerated 0→1 product delivery by running early discovery and applying Design Thinking methodology, turning concepts into polished UI, motion systems, and developer-ready frameworks.
- Reduced post-purchase support tickets by 15% designing intuitive order tracking, returns, and cancellation flows informed by user feedback and support data.

Avesana *Jan 2021 – Dec 2021*

Design Intern • Internship • Delhi, India

- Created digital designs and visual assets using Adobe Illustrator and Photoshop as part of an in-house design team.
- Built foundational skills in visual communication, composition, and design tool proficiency through real client project work.

CORE SKILLS

UX & Design: User Research & Interviews, Usability Testing, Analytics, Heuristic Analysis, Information Architecture, Wireframing & Prototyping, Visual & Interaction Design, Atomic Design Systems, Mobile-First Design (iOS & Android), RTL / Bilingual Design, Design Sprints, Storyboarding, Affinity Mapping, Stakeholder Management, 0→1 Product Design, Mixed-Methods Research, Research Synthesis, Journey Mapping, Accessibility (WCAG), Data-Informed Design, Design Principles

Product & Strategy: Product Discovery, Requirement Gathering, Cross-Functional Stakeholder Workshops, Roadmap Planning, Feature Prioritization, Defining Success Metrics, AARRR Growth Framework, Experimentation & A/B Testing, Data-Driven Decision-Making, Design System Ownership, Behavioral Analytics Integration

AI & Emerging Tech: AI-Augmented Design Workflows, Prompt Engineering (Generative AI Tools), Data-Driven UX Iteration, ML-Informed Design Strategy, AI-Assisted Prototyping, Vibe Coding

Tools: Figma, FigJam, Replit, Lovable AI, Claude, Codex, Adobe Creative Suite, Zeplin, Framer, Miro, Maze, Notion, Hotjar, Jira, Confluence, HTML/CSS (basic)

AWARDS & RECOGNITION

- ***Royal Cyber:*** Collaborative Excellence Award (2025), High Five Everyday Hero (2025), The Backbone Award (2024)
- ***Arzooo:*** Spirit of Arzooo Award (2023), Mountain Mover of the Season (2022)
